

RouteFlow

OWN-FLEET DELIVERY PLANNING AND PROOF OF DELIVERY FOR SAP BUSINESS ONE

From open orders to **signed deliveries.**

Route planning for companies that run their own trucks. RouteFlow takes your open Sales Orders, builds the routes, loads the trucks last-stop-first, and follows every stop to the customer's signature — then writes it all back to B1.

THE PROBLEM

Sound familiar?

Routes are planned on a whiteboard the night before, and re-planned at 6 a.m.

Proof of delivery is a paper slip that reaches the office days later.

Trucks leave half empty or overloaded because weight and pallets are guessed.

Nobody knows what a delivery actually costs.

HOW IT WORKS

Step by step, inside SAP Business One

1 SYNC

Pulls open sales orders and return requests from B1

Sales Order · Return Request

2 DISPATCHER

Compares route scenarios — shortest, fewest trucks, balanced

Route plan

3 ROUTEFLOW

Commits the plan and creates the deliveries, tagged by route and stop

Delivery

4 LOADER

Scans pallets onto the truck, last stop first

Load list

5 DRIVER

Navigates, captures signature and photos — offline if needed

Proof of delivery

6 CUSTOMER

Receives the POD and a tracking link

POD PDF

7 OFFICE

Approved returns and route costs flow back to B1

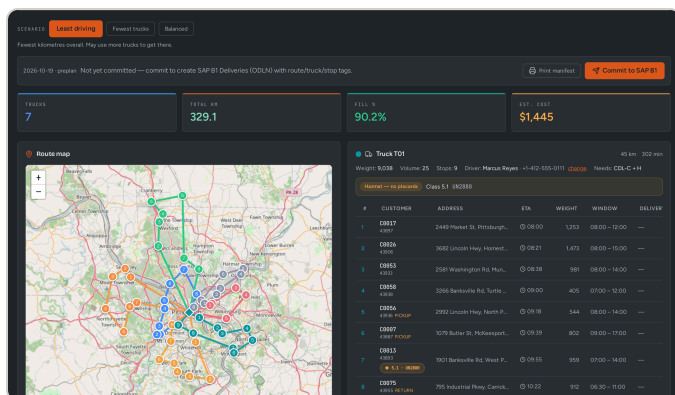

Return · Route cost

WHAT YOU GET

Built for B1, not bolted on

- ✓ Route scenarios with time windows and truck capacity
- ✓ Deliveries created in B1, tagged by route, truck and stop
- ✓ Handheld loading, last stop first
- ✓ Offline driver app with signature, photos and scans
- ✓ Customer delivery notices, tracking page and POD PDF
- ✓ Mileage, maintenance and cost per delivery

INSIDE ROUTEFLOW

Dispatch: compare route scenarios on the map before committing

Screens shown with demo data from fictional companies.

THE BUSINESS CASE

ON-TIME IN FULL

96%

from 87

ORDER-TO-CASH CYCLE

6.2 days

from 11.4

Typical improvement targets we design a rollout to move — not a guarantee or a quoted customer result.

WHO USES IT

Dispatchers

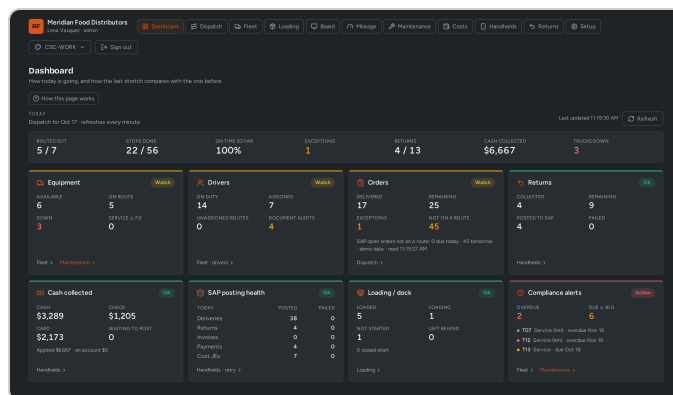

Dock loaders

Drivers

Customer service

WHO IT FITS

Distributors and wholesalers running their own fleet — food and beverage, building supplies, chemicals and industrial goods.

Today's routes, stops, cash collected and on-time delivery

WHY CSC-WORK

Consultancy work that kept repeating became product. Every Flow product runs on the same foundation — shared licensing, the same SAP Business One Service Layer client, the same design system — so they install alongside each other and share data instead of fighting over it.

Built and supported by SAP Business One developers and consultants, on HANA and SQL Server.
